

CLINICAL GUIDELINE

Antimicrobials: protected and rarely used antimicrobials emergency stock cupboard stock holdings

A guideline is intended to assist healthcare professionals in the choice of disease-specific treatments.

Clinical judgement should be exercised on the applicability of any guideline, influenced by individual patient characteristics. Clinicians should be mindful of the potential for harmful polypharmacy and increased susceptibility to adverse drug reactions in patients with multiple morbidities or frailty.

If, after discussion with the patient or carer, there are good reasons for not following a guideline, it is good practice to record these and communicate them to others involved in the care of the patient.

Protected and Rarely Used Antimicrobials: Emergency Cupboard Stock Holdings in NHSGGC

The following antimicrobial emergency cupboard holding locations have been approved and agreed by NHS Greater Glasgow and Clyde Antimicrobial Management Team (AMT).

*** NOTE:** any out of hours requests for an antimicrobial agent **not stocked** in NHSGGC or an agent **only available during working hours** from our aseptic services should be **discussed with on-call micro/ID or virology** (ganciclovir) to **agree ongoing patient management** in these circumstances until the agent becomes available.
